

**National Institute of Standards and Technology
(formerly the National Bureau of Standards-NBS)**

**Commercial Standard CS132-46
Hardware Cloth**

This commercial standard was withdrawn by the U.S. Department of Commerce on May 16, 1977.

The following standard was used to replace CS132-46:
ASTM A740, Standard Specification for Hardware Cloth (Woven or Welded Galvanized Steel Wire Fabric).

ASTM A740 is under the direct responsibility of ASTM Committee A05 on Metallic-Coated Iron and Steel Products and under the jurisdiction of Subcommittee A05.12, Wire Specifications.

ASTM can provide assistance and additional information on this and other Related standards, contact:

**National Bureau of Standards
COMMERCIAL STANDARD**

Action on Proposed Withdrawal

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of Commercial Standard CS 132-46, "Hardware Cloth."

It has been determined that this standard is technically inadequate and that revision would serve no useful purpose. The subject matter of CS 132-46 is adequately covered by American Society for Testing and Materials ANSI/ASTM A740-76, "Standard Specification for Hardware Cloth (Woven or Welded Galvanized Steel Wire Fabric)." This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the FEDERAL REGISTER of January 28, 1977, (42 FR 5460) to withdraw this standard.

The effective date for the withdrawal of this standard will be May 16, 1977. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce procedures.

Dated: March 10, 1977.

ERNEST AMBLER,
Acting Director.

PROMULGATION
of
COMMERCIAL STANDARD CS132-46
for
HARDWARE CLOTH

On June 27, 1945, at the instance of the Hardware Cloth and Poultry Netting Institute, a meeting of producers of hardware cloth adopted the proposed commercial standard for this commodity. This was submitted on August 21, 1945, to leading manufacturers, interested Government agencies, and distributor and user organizations for constructive comment. Following adjustment in the light of the comment received, the recommended commercial standard was circulated for written acceptance on January 23, 1946.

Those concerned have since accepted and approved the standard as shown herein for promulgation by the United States Department of Commerce, through the National Bureau of Standards.

The standard is effective for new production from April 15, 1946.

Promulgation recommended.

F. W. Reynolds,
Acting Chief, Division of Trade Standards.

Promulgated.

E. U. Condon,
Director, National Bureau of Standards.

Promulgation approved.

Henry A. Wallace,
Secretary of Commerce.

HARDWARE CLOTH
Commercial Standard CS132-46

AMENDMENT No. 1

On April 30, 1954, the acceptors of Hardware Cloth, Commercial Standard CS132-46, were notified of an amendment to the Commercial Standard recommended by the Standing Committee. As no objection to the amendment has been received from any acceptor, the following amendment becomes effective as of this date:

Cancel paragraph 12(b), and substitute the following:

12(b) Mesh count:

Warp	±2%
Filler	±5%

Copies of this amendment should be inserted in or filed with all copies of Hardware Cloth, Commercial Standard CS132-46.

HARDWARE CLOTH

COMMERCIAL STANDARD CS132-46

PURPOSE

1. The purpose of this commercial standard is to provide a nationally recognized minimum standard of quality for hardware cloth. It will assist ultimate consumers in determining what sizes of hardware cloth are standard and are regularly produced in sufficient volume to assure reasonably any standard size being readily obtainable in most retail hardware stores and other channels of retail and wholesale trade.

SCOPE

2. This standard covers materials, workmanship, and dimensional requirements for commercial standard hardware cloth, customarily used for window guards, screen door guards, tree guards, ratproofing, grain bins, industrial machinery guards and numberless other home, farm, and industrial purposes. A recommended form for guaranteeing compliance with this standard is included.

DEFINITIONS

3. *Hardware cloth*.— 2×2 , 3×3 , 4×4 , 8×8 mesh (size or count); carbon steel, wire mesh; galvanized (zinc-coated) by the hot-dip process after it is woven.

4. *Mesh*.

4a. Mesh is the width of one opening plus the thickness of one wire after it is galvanized; alternatively considered as being the distance from the center of one wire to the center of the next parallel wire. Thus the measurement of the "mesh" in 2×2 standard hardware cloth is $\frac{1}{2}$ inch; in 3×3 , $\frac{1}{3}$ inch; 4×4 , $\frac{1}{4}$ inch; 8×8 , $\frac{1}{8}$ inch.

4b. The technical designation of "mesh" (count) is the number of meshes per linear inch in the direction of either the warp or filler wires. Thus 2×2 "mesh" means that the woven material has two (2) meshes per linear inch, 3×3 "mesh" has three (3) meshes, 4×4 "mesh" has four (4) meshes, and 8×8 "mesh" has eight (8) meshes per linear inch.

4c. When used as a common designation of the "size" of standard hardware cloth the word "mesh" is generically accepted as meaning the number of openings per linear inch.

MATERIALS AND WORKMANSHIP

5. All standard hardware cloth shall be made of high-grade materials and with good workmanship. It shall be free from any defects that might affect its serviceability. Well-made splices not more

than three-fourths of an inch long and showing no projecting ends (tails) are permissible at any point of any individual wire, provided, however, that the number of splices shall not exceed thirty (30) in any stock roll nor two (2) in any single square foot of finished standard hardware cloth. The metal used for the coating shall be zinc of at least 98 percent purity.

DETAIL REQUIREMENTS

6. The mesh counts, wire sizes, and weights for standard hardware cloth are as follows:

Metal	Mesh	Diameter of wire (after galvanizing)	Weight
		<i>Inch</i>	<i>Lb./100 sq. ft.</i>
Carbon steel.....	2×2	0.0410	29
Do.....	3×3	.0317	28
Do.....	4×4	.0258	27
Do.....	8×8	.0173	24

WIDTHS

7. Stock widths of all standard sizes of hardware cloth are 24, 30, 36, and 48 inches.

ROLL LENGTH

8. All standard stock rolls of hardware cloth shall be 100 linear feet in length. No standard stock roll shall contain more than two pieces, and no single piece shall be less than 10 linear feet in length.

MESH SIZE OR COUNT

9. The mesh size of standard hardware cloth shall be determined by counting the meshes for any interval of one continuous linear foot, in the direction of either the warp or filler wires and dividing the result thus obtained by twelve (12).

WIRE DIAMETER

10. All wire diameter designations in this commercial standard for hardware cloth are the finished sizes after galvanizing. Accuracy of the wire size in standard hardware cloth shall be determined by computing separately the average measured diameter of not less than ten (10) warp wires and of the same number of filler wires, taken at random from the finished, galvanized-after-woven, hardware cloth in any single standard roll.

SERVAGES

11. All standard widths of hardware cloth shall have two selvage edges.

TOLERANCES

12. Permissible variations in the measurements of standard hardware cloth shall be:

- (a) Wire diameter, after galvanizing: minus 0.0015 inch for 2×2 and 3×3 mesh; minus 0.001 inch for 4×4 and 8×8 mesh.¹
- (b) Mesh count:
 - Warp, $\frac{1}{4}$ mesh per linear foot plus or minus.
 - Filler, $\frac{1}{2}$ mesh per linear foot plus or minus.
- (c) Width: $\frac{1}{4}$ inch, plus or minus.
- (d) Roll length: minus 4 inches.¹
- (e) Weight: 10 percent plus or minus.

LABELING

13. The mesh, wire size, width, and length of standard hardware cloth in each individual roll shall be clearly shown by means of a tag or printed label attached to the roll in a conspicuous place.

GUARANTEE

14. In order to assure the purchaser that he is receiving hardware cloth which complies with the requirements of this standard, it is recommended that the tag or label on each roll carry the following guarantee:

We hereby guarantee that this Hardware Cloth complies with all requirements of Commercial Standard CS132-46, as issued by the National Bureau of Standards of the United States Department of Commerce.

(Signed)

EFFECTIVE DATE

15. The standard is effective for new production from April 15, 1946.

STANDING COMMITTEE

16. The following individuals comprise the membership of the standing committee, as appointed by the National Bureau of Standards. This committee is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each organization nominated its own representative. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

GEORGE F. WRIGHT (chairman), G. F. Wright Steel & Wire Co., 243 Stafford Street, Worcester, Mass.

JOHN D. STODDER, Cyclone Fence Division, American Steel & Wire Co., Waukegan, Ill.

HISTORY OF PROJECT

17. On September 26, 1944, the Hardware Cloth and Poultry Netting Institute requested the cooperation of the National Bureau of Standards in the establishment of a commercial standard for hardware cloth. A preliminary draft of the proposed commercial standard was submitted to manufacturers for their review and comment. All comment was carefully considered at a meeting held in New York City on June 27, 1945. An adjusted draft was then prepared and submitted on August 21, 1945, to technical organizations, Government agencies, testing laboratories, manufacturers, and wholesale, retail, and user organizations for further review and comment. The standard was then modified in accordance with composite recommendations of those concerned and circulated on January 23, 1946, to the trade for written acceptance.

18. Upon receipt of official acceptances, estimated to represent a satisfactory majority of the production by volume and in the absence of active valid opposition, the standard was promulgated on March 15, 1946, as Commercial Standard CS132-46.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date _____

Division of Trade Standards,
National Bureau of Standards,
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS132-46 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

Production ¹ Distribution ¹ Purchase ¹ Testing ¹
of hardware cloth.

We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer _____
(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer _____

Organization _____
(Fill in exactly as it should be listed)

Street address _____

City, zone, and State _____

¹ Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General support" should be added after the signature.

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signatures indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

ACCEPTORS

19. The organizations listed below have individually accepted these specifications for use as far as practicable in the production, distribution, testing or purchase of hardware cloth. In accepting the standard they reserved the right to depart therefrom as they individually deem advisable. It is expected that articles which actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.

WITHDRAWN

COMMERCIAL STANDARDS

CS No.	Item
0-40.	Commercial standards and their value to business (third edition).
1-42.	Clinical thermometers (third edition).
2-30.	Mopsticks.
3-40.	Stoddard solvent (third edition).
4-29.	Staple porcelain (all-clay) plumbing fixtures.
5-46.	Pipe nipples; brass, copper, steel and wrought-iron (second edition).
6-31.	Wrought-iron pipe nipples (second edition). Superseded by CS5-46.
7-29.	Standard weight malleable iron or steel screwed unions.
8-41.	Gage blanks (third edition).
9-33.	Builders' template hardware (second edition).
10-29.	Brass pipe nipples. Superseded by CS5-46.
11-41.	Moisture regains of cotton yarns (second edition).
12-40.	Fuel oils (fifth edition).
13-44.	Dress patterns (fourth edition).
14-43.	Boys' button-on waists, shirts, junior and sport shirts (made from woven fabrics) (third edition).
(E) 15-43. ¹	Men's pajamas (made from woven fabrics) (second edition).
16-29.	Wall paper.
17-42.	Diamond core drill fittings (third edition).
19-29.	Hickory golf shafts.
19-32.	Foundry patterns of wood (second edition).
20-42.	Staple vitreous china plumbing fixtures (third edition).
21-39.	Interchangeable ground-glass joints, stopcocks, and stoppers (fourth edition).
22-40.	Builders' hardware (nontemplate) (second edition).
23-30.	Feldspar.
24-43.	Screw threads and tap-drill sizes.
25-30.	Special screw threads. Superseded by CS24-43.
26-30.	Aromatic red cedar closet lining.
27-36.	Mirrors (second edition).
28-46.	Cotton fabric tents, tarpaulins and covers (second edition).
29-31.	Staple seats for water-closet bowls.
30-31.	Colors for sanitary ware.
31-38.	Wood shingles (fourth edition).
32-31.	Cotton cloth for rubber and pyroxylin coating.
33-43.	Knit underwear (exclusive of rayon) (second edition).
34-31.	Bag, case, and strap leather.
35-42.	Plywood (hardwood and eastern red cedar) (second edition).
36-33.	Fourdrinier wire cloth (second edition).
37-31.	Steel bone plates and screws.
38-32.	Hospital rubber sheeting.
39-37.	Wool and part wool blankets (second edition). (Withdrawn as commercial standard, July 14, 1941.)
40-32.	Surgeons' rubber gloves.
41-32.	Surgeons' latex gloves.
42-43.	Structural fiber insulating board (third edition).
43-32.	Grading of sulphonated oils.
44-32.	Apple wraps.
45-45.	Douglas fir plywood (sixth edition).
46-40.	Hosiery lengths and sizes (third edition).
47-34.	Marking of gold-filled and rolled-gold-plate articles other than watchcases.

CS No.	Item
48-40.	Domestic burners for Pennsylvania anthracite (underfeed type) (second edition).
49-34.	Chip board, laminated chip board, and miscellaneous boards for bookbinding purposes.
50-34.	Binders board for bookbinding and other purposes.
51-35.	Marking articles made of silver in combination with gold.
52-35.	Mohair pile fabrics (100-percent mohair plain velvet, 100-percent mohair plain frieze, and 50-percent mohair plain frieze).
53-35.	Colors and finishes for cast stone.
54-35.	Mattresses for hospitals.
55-35.	Mattresses for institutions.
56-41.	Oak flooring (second edition).
57-40.	Book cloths, buckrams, and impregnated fabrics for bookbinding purposes except library bindings (second edition).
58-36.	Woven elastic fabrics for use in overalls (overall elastic webbing).
59-44.	Textiles—testing and reporting (fourth edition).
60-36.	Hardwood dimension lumber.
61-37.	Wood-slat venetian blinds.
62-38.	Colors for kitchen accessories.
63-38.	Colors for bathroom accessories.
64-37.	Walnut veneers.
65-43.	Methods of analysis and of reporting fiber composition of textile products (second edition).
66-38.	Marking of articles made wholly or in part of platinum.
67-38.	Marking articles made of karat gold.
68-38.	Liquid hypochlorite disinfectant, deodorant, and germicide.
69-38.	Pine oil disinfectant.
70-41.	Phenolic disinfectant (emulsifying type) (second edition) (published with CS71-41).
71-41.	Phenolic disinfectant (soluble type) (second edition) (published with CS70-41).
72-38.	Household insecticide (liquid spray type).
73-45.	Old growth Douglas fir standard stock doors (third edition).
74-39.	Solid hardwood wall paneling.
75-42.	Automatic mechanical draft oil burners designed for domestic installations (second edition).
76-39.	Hardwood interior trim and molding.
77-40.	Sanitary cast-iron enameled ware.
78-40.	Ground-and-polished lenses for sun glasses (second edition) (published with CS79-40).
79-40.	Blown, drawn, and dropped lenses for sun glasses (second edition) (published with CS78-40).
80-41.	Electric direction signal systems other than semaphore type for commercial and other vehicles subject to special motor vehicle laws (after market).
81-41.	Adverse-weather lamps for vehicles (after market).
82-41.	Inner-controlled spotlamps for vehicles (after market).
83-41.	Clearance, marker, and identification lamps for vehicles (after market).

¹ Where (E) precedes the CS number, it indicates an emergency commercial standard, drafted under war conditions with a view toward early revision.

CS No.	Item	CS No.	Item
84-41.	Electric tail lamps for vehicles (after market).	108-43.	Treading automobile and truck tires.
85-41.	Electric license-plate lamps for vehicles (after market).	109-44.	Solid-fuel-burning forced-air furnaces.
86-41.	Electric stop lamps for vehicles (after market).	110-43.	Tire repairs — vulcanized (passenger, truck, and bus tires).
87-41.	Red electric warning lanterns.	111-43.	Earthenware (vitreous-glazed) plumbing fixtures.
88-41.	Liquid-burning flares.	112-43.	Homogeneous fiber wallboard.
89-40.	Hardwood stair treads and risers.	113-44.	Oil-burning floor furnaces equipped with vaporizing pot-type burners.
90- .	(Reserved for power shovels and cranes).	114-43.	Hospital sheeting for mattress protection.
91-41.	Factory-fitted Douglas fir entrance doors.	115-44.	Porcelain-enameled tanks for domestic use.
92-41.	Cedar, cypress and redwood tank stock lumber.	116-44.	Bituminized-fibre drain and sewer pipe.
93-41.	Portable electric drills (exclusive of high frequency).	117-44.	Mineral wool; blankets, blocks, insulating cement, and pipe insulation for heated industrial equipment.
94-41.	Calking lead.	118-44.	Marking of jewelry and novelties of silver.
95-41.	Lead pipe.	(E)119-45.	Dial indicators (for linear measurements).
96-41.	Lead traps and bends.	120-44.	Standard stock ponderosa pine doors.
97-42.	Electric supplementary driving and passing lamps for vehicles (after market).	121-45.	Women's slip sizes (woven fabrics).
98-42.	Artists' oil paints.	122-45.	Western hemlock plywood.
99-42.	Gas floor furnaces—gravity circulating type.	123-45.	Grading of diamond powder.
100-44.	Porcelain-enameled steel utensils (second edition).	(E)124-45.	Master disks.
101-43.	Flue-connected oil-burning space heaters equipped with vaporizing pot-type burners.	125-45.	Prefabricated homes.
102- .	(Reserved for Diesel and fuel-oil engines).	126-45.	Tank mounted air compressors.
103-42.	Cotton and rayon velour (jacquard and plain).	127-45.	Self-contained mechanically refrigerated drinking water coolers.
104-46.	Warm-air furnaces equipped with vaporizing pot-type oil burners (second edition).	128-45.	Men's sport shirt sizes—woven fabrics (other than those marked with regular neckband sizes).
105-43.	Mineral wool; loose granulated, or felted form, in low-temperature installations.	129-46.	Materials for safety wearing apparel.
106-44.	Boys' pajama sizes (woven fabrics) (second edition).	130-46.	Color materials for art education in schools.
107-45.	Commercial electric-refrigeration condensing units (second edition).	131-46.	Industrial mineral wool products, all types—testing and reporting.
		132-46.	Hardware cloth.
		133-46.	Woven wire netting.

NOTICE.—Those interested in commercial standards with a view toward accepting them as a basis of everyday practice may secure copies of the above standards, while the supply lasts, by addressing the Division of Trade Standards, National Bureau of Standards, Washington 25, D. C.
